User: Holds the Grumber account info. A **User** can have multiple **Accounts** associated with it, and also has one **Assignment List** associated with it.

Accounts: Holds the login credentials (username and password) of multiple accounts compatible with Grumber and associates them with the **User.** The **Accounts** are used to pull **Assignment** information.

Assignment: Holds the assignment name, course name, and due date of a **User's** assignment which is created manually or assimilated from the **User's Accounts.**

Assignment List: A single list of all **Assignments** associated with the **User.** Will be able to be displayed in different ways (list, calendar).
